Volume 179 1989

Table of contents

No. 1 1–254 issued on January 15, 1989
No. 2 255–488 issued on February 1, 1989
No. 3 489–726 issued on February 15, 1989

Enzyme nomenclature. Recommendations 1984. Supplement 2: corrections and additions — *Nomenclature Committee of the International Union of Biochemistry (NC-IUB)* 489–533

Corrections 725

Review

Molecular mechanism of visual transduction
M. Chabre and P. Deterre 255–266

Nucleic acids, protein synthesis and molecular genetics

Factors involved in preferential transcription of the fibroin gene
S. Takiya and Y. Suzuki 1– 9

Sequence analysis and expression of the arginine-deiminase and carbamate-kinase genes of *Pseudomonas aeruginosa*
H. Baur, E. Luethi, V. Stalon, A. Mercenier and D. Haas 53– 60

Sequence analysis of the *lpdV* gene for lipoamide dehydrogenase of branched-chain-oxoacid dehydrogenase of *Pseudomonas putida*
G. Burns, T. Brown, K. Hatter and J. R. Sokatch 61– 69

Molecular cloning of rat and human type IX collagen cDNA and localization of the α1(IX) gene on the human chromosome 6
T. Kimura, M.-G. Matteï, J. W. Stevens, M. B. Goldring, Y. Ninomiya and B. R. Olsen 71– 78

Human plasma inter-α-trypsin inhibitor is encoded by four genes on three chromosomes
M. Diarra-Mehrpour, J. Bourguignon, R. Sesboüé, M.-G. Matteï, E. Passage, J.-P. Salier and J.-P. Martin 147–154

Proteinase K from *Tritirachium album Limber* — Characterization of the chromosomal gene and expression of the cDNA in *Escherichia coli*
F. A. Gunkel and H. G. Gassen 185–194

The azurin gene from *Pseudomonas aeruginosa* — Cloning and characterization
R. H. A. Arvidsson, M. Nordling and L. G. Lundberg 195–200

Molecular cloning, sequencing and expression in *Escherichia coli* of the 25-kDa growth-related protein of Ehrlich ascites tumor and its homology to mammalian stress proteins
M. Gaestel, B. Gross, R. Benndorf, M. Strauss, W.-H. Schunk, R. Kraft, A. Otto, H. Böhm, J. Stahl, H. Drabsch and H. Bielka 209–213

The genes for the frog skin peptides GLa, xenopsin, levitide and caerulein contain a homologous export exon encoding a signal sequence and part of an amphiphilic peptide
K. Kuchler, G. Kreil and I. Sures 281–285

Formation and structure of reaction products of *cis*-$PtCl_2(NH_3)_2$ with d(ApG) and/or d(GpA) in di-, tri- and penta-nucleotides — Preference for GpA chelation over ApG chelation
F. J. Dijt, J.-C. Chottard, J.-P. Girault and J. Reedijk 333–344

Molecular characterization of a *Dictyostelium discoideum* gene encoding a multifunctional enzyme of the pyrimidine pathway
M. Faure, J. H. Camonis and M. Jacquet 345–358

Preparation and use of a universal primed Sepharose for the purification of DNA-binding proteins
B. Arcangioli, S. Pochet, R. Sousa and T. Huynh-Dinh 359–363

Characterization of *MSM1*, the structural gene for yeast mitochondrial methionyl-tRNA synthetase
A. Tzagoloff, A. Vambutas and A. Akai 365–371

Identification of a yeast ribonuclease H as an Sm antigen
R. Karwan and I. Kindås-Mügge 549–555

Structural organization of the human heme oxygenase gene and the function of its promoter
S. Shibahara, M. Sato, R. M. Muller and T. Yoshida 557–563

Characterization of two murine (2'-5')$(A)_n$-dependent endonucleases of different molecular mass
C. Bisbal, T. Salehzada, B. Lebleu and B. Bayard 595–602

Characterization of the ribosomal properties required for formation of a GTPase active complex with the eukaryotic elongation factor 2
O. Nygård and L. Nilsson 603–608

Protein chemistry and structure

Structural features of lipoprotein lipase — Lipase family relationships, binding interactions, non-equivalence of lipase cofactors, vitellogenin similarities and functional subdivision of lipoprotein lipase
B. Persson, G. Bengtsson-Olivecrona, S. Enerbäck, T. Olivecrona and H. Jörnvall 39– 45

Myosin heavy-chain isoforms in human smooth muscle
S. Sartore, N. De Marzo, A. C. Borrione, A. M. C. Zanellato, L. Saggin, L. Fabbri and S. Schiaffino 79– 85

Conformational forces affecting the folding pathways of dendrotoxins I and K from black mamba venom
M. Hollecker and D. Larcher 87–94

Preparation of immobilized monomeric actin and its use in the isolation of protease-free and ribonuclease-free pancreatic deoxyribonuclease I
B. Nefsky and A. Bretscher 215–219

The quaternary structure of the dihydrolipoyl transacetylase component of the pyruvate dehydrogenase complex from *Azotobacter vinelandii* — A reconsideration
R. Hanemaaijer, A. H. Westphal, T. Van Der Heiden, A. De Kok and C. Veeger 287–292

Vanadate-mediated photocleavage of rabbit skeletal myosin
G. Mocz 373–378

Refolding human serum albumin at relatively high protein concentration
S. J. Burton, A. V. Quirk and P. C. Wood 379–387

Purification, characterization and revised amino acid sequence of a second thioredoxin from *Corynebacterium nephridii*
S. C. McFarlan, H. P. C. Hogenkamp, E. D. Eccleston, J. B. Howard and J. A. Fuchs 389–398

Modulation of the affinity of the single-stranded DNA-binding protein of *Escherichia coli* (*E. coli* SSB) to poly(dT) by site-directed mutagenesis
I. Bayer, A. Fliess, J. Greipel, C. Urbanke and G. Maass 399–404

Nucleotide sequence of the glyceraldehyde-3-phosphate dehydrogenase gene from the mesophilic methanogenic archaebacteria *Methanobacterium bryantii* and *Methanobacterium formicicum* — Comparison with the respective gene structure of the closely related extreme thermophile *Methanothermus fervidus*
S. Fabry, J. Lang, T. Niermann, M. Vingron and R. Hensel 405–413

Phosphorylation of avian retrovirus matrix protein by Ca^{2+}/phospholipid-dependent protein kinase
J. Leis, N. Phillips, X. Fu, P. T. Tuazon and J. A. Traugh 415–422

Characterization of a 48-kDa nucleic-acid-binding fragment of nucleolin
M. Sapp, A. Richter, K. Weisshart, M. Caizergues-Ferrer, F. Amalric, M. O. Wallace, M. N. Kirstein and M. O. J. Olson 541–548

Preparation, characterization and application of interleukin-1β mutant proteins with surface-accessible cysteine residues
P. Wingfield, P. Graber, A. R. Shaw, A. M. Gronenborn, G. M. Clore and H. R. MacDonald 565–571

A structural requirement in the subsite F of lysozyme — The role of arginine 115 in human lysozyme revealed by site-directed mutagenesis
M. Muraki, M. Morikawa, Y. Jigami and H. Tanaka 573–579

Purification and properties of five different forms of human procarboxypeptidases
R. Pascual, F. J. Burgos, M. Salva, F. Soriano, E. Mendez and F. X. Aviles 609–616

Purification of nitrate reductase from *Nicotiana plumbaginifolia* by affinity chromatography using 5'AMP-Sepharose and monoclonal antibodies
T. Moureaux, M.-T. Leydecker and C. Meyer 617–620

The amino acid sequence of adenylate kinase from *Paracoccus denitrificans* and its relationship to mitochondrial and microbial adenylate kinases
P. Spürgin, A. G. Tomasselli and E. Schiltz 621–628

A high-resolution ^{1}H-NMR study of human transforming growth factor α — Structure and pH-dependent conformational interconversion
M. J. Tappin, R. M. Cooke, J. E. Fitton and I. D. Campbell 629–637

Hemoglobin from the Antarctic fish *Notothenia coriiceps neglecta* — 1. Purification and characterisation
R. D'Avino and G. Di Prisco 699–705

Hemoglobin from the Antarctic fish *Notothenia coriiceps neglecta* — 2. Amino acid sequence of the α chain of Hb 1
R. D'Avino, C. Caruso, M. Romano, L. Camardella, B. Rutigliano and G. Di Prisco 707–713

The influence of purification and protein heterogeneity on the crystallization of *p*-hydroxybenzoate hydroxylase
J. M. van der Laan, M. B. A. Swarte, H. Groendijk, W. G. J. Hol and J. Drenth 715–724

Enzymology

On the non-linear Eadie plots of the tRNA kinetics and non-linear Dixon plots of the PP_i inhibition kinetics of the aminoacyl-tRNA synthetases — An analysis of the amino-acylation of tRNA in a model reaction
R. K. Airas 95–100

The membrane-bound hydrogenase from *Paracoccus denitrificans* — Purification and molecular characterization
K. Knüttel, K. Schneider, H. G. Schlegel and A. Müller 101–108

A comparison of an ATPase from the archaebacterium *Halobacterium saccharovorum* with the F_1 moiety from the *Escherichia coli* ATP synthase
H. Stan-Lotter and L. I. Hochstein 155–160

Characterization of the S'-subsite specificity of porcine pancreatic elastase
V. Schellenberger, U. Schellenberger, Y. V. Mitin and H.-D. Jakubke 161–163

Purification, characterization and subcellular localization of pig liver α-L-iduronidase
T. Ohshita, H. Sakuda, S. Nakasone and T. Iwamasa 201–207

Alanine dehydrogenase from *Streptomyces fradiae* — Purification and properties
A. Vančura, I. Vančurová, J. Volc, S. K. T. Jones, M. Flieger, G. Basařová and V. Běhal 221–227

ADP-ribosylation of actin causes increase in the rate of ATP exchange and inhibition of ATP hydrolysis
U. Geipel, I. Just, B. Schering, D. Haas and K. Aktories 229–232

Specific *S*-thiolation of a 30-kDa cytosolic protein from rat liver under oxidative stress
K. Rokutan, J. A. Thomas and H. Sies 233–239

DNA-dependent mono(ADP-ribosyl)ation of p33, an acceptor protein in hen liver nuclei
K. Mishima, M. Tsuchiya, Y. Tanigawa, Y. Yoshimura and M. Shimoyama 267–273

Synthesis and characterization of 1-substituted 5-alkylphenazine derivatives carrying functional groups
T. Yomo, H. Sawai, I. Urabe, Y. Yamada and H. Okada 293–298

Preparation and kinetic properties of 5-ethylphenazine–poly(ethylene glycol)–NAD^+ conjugate, a unique catalyst having an intramolecular reaction step
T. Yomo, H. Sawai, I. Urabe and H. Okada 299–305

The temperature and pH dependence of some properties of *p*-hydroxybenzoate hydroxylase from *Pseudomonas fluorescens*
W. J. H. Van Berkel and F. Müller 307–314

Purification and characterization of 20-hydroxy-leukotriene B_4 dehydrogenase in human neutrophils
Y. Gotoh, H. Sumimoto and S. Minakami 315–321

Studies on uroporphyrinogen decarboxylase of etiolated *Euglena gracilis* Z
A. A. Juknat, A. Seubert, S. Seubert and H. Ippen 423–428

Two different intrachain cAMP sites in the cAMP-dependent protein kinase of the dimorphic fungus *Mucor rouxii*
C. Paveto, S. Passeron, J. D. Corbin and S. Moreno 429–434

Synthesis and biological activity of N^6-{*N*[(4-azido-3,5,6-trifluoro)-pyridin-2-yl]-2-amino-ethyl}-adenosine 5′-monophosphate, a new AMP photoactivatable derivative
S. Sicsic, J. Leonil and F. Le Goffic 435–440

Comparative characterization of membrane-associated and cytosolic Tyr-protein kinases in human erythrocytes
G. Clari and V. Moret 581–588

Isolation of a galactose-free 20-kDa fragment exhibiting butyrylcholine esterase and aryl acylamidase activity from human serum butyrylcholine esterase by limited α-chymotrypsin digestion
R. V. Rao and A. S. Balasubramanian 639–644

The carboxyltransferase activity of the sodium-ion-translocating methylmalonyl-CoA decarboxylase of *Veillonella alcalescens*
A. Hoffmann, W. Hilpert and P. Dimroth 645–650

Carbohydrates, lipids and other natural products

Structural and physicochemical requirements of endotoxins for the activation of arachidonic acid metabolism in mouse peritoneal macrophages *in vitro*
T. Lüderitz, K. Brandenburg, U. Seydel, A. Roth, C. Galanos and E. Th. Rietschel 11–16

Carbohydrate structure of glycoprotein 65 encoded by the polycythemia-inducing strain of Friend spleen focus-forming virus
K.-H. Strube and R. Geyer 441–450

Synthesis of glycoconjugates derived from various lipopolysaccharides of the Vibrionaceae family
J. H. Banoub, D. H. Shaw, N. A. Nakhla and H. J. Hodder 651–657

Physical and inorganic biochemistry

Implication of the $\alpha 1\beta 1$ interface in the hemoglobin affinity changes – A comparative study between normal and San Diego fully ligated hemoglobins
S. El Antri, C. Zentz and B. Alpert 165–168

Evaluation of the metal-ion-coordinating differences between the 2′-, 3′- and 5′-monophosphates of adenosine
S. S. Massoud and H. Sigel 451–458

Comparative X-ray and Fourier-transform-infrared investigations of conformational properties of bacterial and synthetic lipid A of *Escherichia coli* and *Salmonella minnesota* as well as partial structures and analogues thereof
H. Labischinski, D. Naumann, C. Schultz, S. Kusumoto, T. Shiba, E. Th. Rietschel and P. Giesbrecht 659–665

Membranes and bioenergetics

Ionic-strength modulation of electrically induced permeabilization and associated fusion of mammalian cells
M.-P. Rols and J. Teissie 109–115

Chloroplast ATP synthase contains one single copy of subunit δ that is indispensable for photophosphorylation
S. Engelbrecht, K. Schürmann and W. Junge 117–122

The predicted secondary structures of the nucleotide-binding sites of six cation-transporting ATPases lead to a probable tertiary fold
W. R. Taylor and N. M. Green 241–248

CF_0, the proton channel of chloroplast ATP synthase – After removal of CF_1 it appears in two forms with highly different proton conductance
H. Lill and W. Junge 459–467

Proton translocation coupled to the oxidation of carbon monoxide to CO_2 and H_2 in *Methanosarcina barkeri*
M. Bott and R. K. Thauer 469–472

Effect of papain digestion on polypeptide subunits and electron-transfer pathways in mitochondrial b-c_1 complex
M. Lorusso, T. Cocco, D. Boffoli, D. Gatti, S. Meinhardt, T. Ohnishi and S. Papa 535–540

Permeability to cefsulodin of the outer membrane of *Pseudomonas aeruginosa* and discrimination between β-lactamase-mediated trapping and hydrolysis as mechanisms of resistance
R. G. Hewinson, S. J. Cartwright, M. P. E. Slack, R. D. Whipp, M. J. Woodward and W. W. Nichols 667–675

Modulation of the GTPase activity of the chloroplast F_1-ATPase by ATP binding at noncatalytic sites
Z. Xue and P. D. Boyer 677–681

The energy-conserving nitric-oxide-reductase system in *Paracoccus denitrificans* — Distinction from the nitrite reductase that catalyses synthesis of nitric oxide and evidence from trapping experiments for nitric oxide as a free intermediate during denitrification
G. J. Carr, M. D. Page and S. J. Ferguson 683–692

Metabolism and metabolic regulation

Inhibition of mammalian spermine synthase by *N*-alkylated-1,3-diaminopropane derivatives *in vitro* and in cultured rat hepatoma cells
J. G. Baillon, M. Kolb and P. S. Mamont 17– 21

Molecular differences between rat-liver and rat-kidney biliverdin reductase — Implications for their *in vivo* regulation
O. Cascone, R. B. Frydman, P. Ferrara, M. L. Tomaro and J. Rosenfeld 123–130

Metabolites controlling the rate of starch synthesis in the chloroplast of C_3 plants
G. Pettersson and U. Ryde-Pettersson 169–172

Stimulation of glucose phosphorylation by fructose in isolated rat hepatocytes
E. Van Schaftingen and A. Vandercammen 173–177

A protein from rat liver confers to glucokinase the property of being antagonistically regulated by fructose 6-phosphate and fructose 1-phosphate
E. Van Schaftingen 179–184

Phosphorylation of bovine hormone-sensitive lipase by the AMP-activated protein kinase — A possible antilipolytic mechanism
A. J. Garton, D. G. Campbell, D. Carling, D. G. Hardie, R. J. Colbran and S. J. Yeaman 249–254

Signal transduction and molecular neurobiology

Evidence indicating that the glucagon-induced increase in cytoplasmic free Ca^{2+} concentration in hepatocytes is mediated by an increase in cyclic AMP concentration
J. M. Staddon and R. G. Hansford 47– 52

Mechanism of action of bombesin on amylase secretion — Evidence for a Ca^{2+}-independent pathway
R. Bruzzone 323–331

Intracellular localization of inositol-phospholipid-metabolizing enzymes in rabbit fast-twitch skeletal muscle — Can D-*myo*-inositol 1,4,5-trisphosphate play a role in excitation-contraction coupling?
M. Varsányi, M. Messer and N. R. Brandt 473–479

The lipopolysaccharide-induced stimulation of peritoneal macrophages involves at least two signal pathways — Partial stimulation by lipid A precursors
B. Benninghoff, W. Dröge and V. Lehmann 589–594

Molecular cell biology

Chronic stimulation-induced changes of myosin light chains at the mRNA and protein levels in rat fast-twitch muscle
B. J. Kirschbaum, J.-A. Simoneau, A. Bär, P. J. R. Barton, M. E. Buckingham and D. Pette 23– 29

The multiplicity of troponin T isoforms — Distribution in normal rabbit muscles and effects of chronic stimulation
K. T. Härtner, B. J. Kirschbaum and D. Pette 31– 38

Specific antibodies reveal ordered and cell-cycle-related use of histone-H4 acetylation sites in mammalian cells
B. M. Turner and G. Fellows 131–139

Photomorphogenesis in *Physarum polycephalum* — Temporal expression pattern of actin, α- and β-tubulin
B. Poetsch, T. Schreckenbach and A. K. Werenskiold 141–146

Chronic stimulation of rat skeletal muscle induces coordinate increases in mitochondrial and nuclear mRNAs of cytochrome-*c*-oxidase subunits
D. A. Hood, R. Zak and D. Pette 275–280

Expression of human lactotransferrin receptors in phytohemagglutinin-stimulated human peripheral blood lymphocytes — Isolation of the receptors by antiligand-affinity chromatography
J. Mazurier, D. Legrand, W. L. Hu, J. Montreuil and G. Spik 481–487

Defective processing and binding of low-density lipoprotein receptors in fibroblasts from a familial hypercholesterolaemic subject
B. L. Knight, S. J. P. Gavigan, A. K. Soutar and D. D. Patel 693–698

Indexed in *Current Contents*
